

# EUROVIB NEWSLETTER

## **Sir Francis Crick Institute**

Eurovib have supplied mechanical services isolation products to the currently under construction Sir Francis Crick Institute. This state of the art research facility located near Kings Cross in London incorporates some of the most critical isolation requirements.

Supplied via our Barking based distributors Barnvale Engineering & Supply Co. Ltd, this is probably the largest vibration control project currently underway in the U.K.

## **School Meals Distribution Centre, Barbados**

Eurovib have supplied critical noise insulation products for a school meal distribution centre in Barbados.

The application of the supplied products has resulted in controlled noise emissions from the standby generator systems ensuring continuity of service even in the event of a major power failure on the island.

## **Stockists; Agents; and Distributors**

Eurovib have vacancies for stockists; agents; and distributors throughout the U.K. & Europe.

Our very popular and fast moving products are used throughout industry and are incorporated in many standard items of plant. Engineers or representatives already servicing engineering clients will quickly be able to identify opportunities to sell our products and benefit from our highly competitive position in this market.

# EUROVIB NEWSLETTER

## **Same Day/ Next Day Delivery**

Our despatch and packing facility has been redeveloped and now utilises a delivery service that can despatch hourly for same day deliveries and daily for next day service.

This ensures that our clients have deliveries that precisely meet their contractual and programme requirements.

## **Eurovib Supply Noise & Vibration Control Hardware to Luxury Property Development in Barbados**

Eurovib have supplied noise & vibration control hardware to a second super luxury complex in Sandy Lane, Barbados. With properties selling for several million pounds this development is a direct follow on from the highly successful "The Sands" development in the same area of Barbados.

## **Registration to ISO 14001 Achieved**

We are pleased to announce that we have achieved the required standard for registration to ISO 14001 – Environmental Management.

ISO 14001 is an internationally recognised standard that outlines how to put an effective environmental management system in place. It is designed to help our business remain commercially successful without overlooking our environmental responsibilities.

It provides the framework necessary to allow us to meet the increasingly high client expectations of corporate responsibility as well as the legal and regulatory requirements.

## **New Web Site Under Development**

We have now committed to a complete overhaul & review of our web presence.

Our old web site, whilst adequate for its purpose when originally designed has become dated in terms of both product data and current good practice. We have therefore made the decision to undertake a complete overhaul of our web site. If there are any particular features you would like to see incorporated then please do not hesitate to ask. We cannot promise that they will be added but we will try our very best to implement as many as we possibly can.
